

Project Access

Hamilton County Health Care Partnerships For Life

BY REBECCA ROCHAT

Dr. Walter Puckett

Dr. H. Barrett Heywood

While doctors and hospitals have traditionally provided charity care, in Hamilton County, the coordinated efforts of health professionals is making it far more accessible. Since its inception in 2004, Project Access has made health care available to nearly 7,600 low-income, uninsured residents of Hamilton County. With the leadership of the Chattanooga-Hamilton County Medical Society and the Medical Foundation of Chattanooga, over \$78.6 million dollars of free health care has been offered by 640 volunteer physicians to uninsured Hamilton County residents.

Erlanger Health System CEO James Brexler, Project Access Operations Council Chair Joseph Cofer, MD, Project Access patient Amanda Payne, Parkridge Health System CEO Darrell Moore, Medical Foundation of Chattanooga President Phyllis Miller, MD, and Memorial Health Care System CEO Jim Hobson.

What is Project Access?

Project Access is not a health insurance program; it's a coordinated care network between doctors, hospitals, medical schools, community clinics and the Hamilton County Health Department. Doctors in the network partner together to provide specialty health care for Hamilton County residents in low-income jobs with no health care benefits. They also provide health care for people who earn too much to qualify for Federal or State programs such as TennCare and Medicaid but cannot afford or obtain insurance. To qualify for Project Access, patients must live in Hamilton County 90 days prior to enrolling and their family income must be 150 percent below the poverty level (\$27,795 for a family of three). According to Rae Young Bond, executive director of the Medical Society and Foundation, patients must have a medical need or condition that requires treatment and not be eligible for health insurance or other benefits.

Leadership: Then and Now

When Dr. Joseph Cofer, professor of surgery and surgery residency program director at the UTC College of Medicine, was president of the Chattanooga-Hamilton County Medical Society in 2002, he wanted to make a difference.

So when he saw people with acute medical problems "fall out of the system" he worked through the Medical Society to find a solution to the health care crisis. That led them to replicate a health care system he saw modeled in North Carolina. Dr. Cofer and Medical Society leaders met with the leaders from the area's major hospital systems, and together, they agreed to create the Project Access initiative.

Now, Dr. Cofer continues to serve as the chairman of the Operations Council for Project Access. "Through Project Access, many people who are working but uninsured can continue to work while we address their medical

conditions," he says. In many cases they would have been unable to work without medical care."

Since the inception of Project Access, Dr. Walter Puckett, a cardiologist at Erlanger Hospital, has served as the medical director of the initiative. Dr. Puckett received his training in large hospitals treating indigent patients. So when Dr. Cofer asked for his help with Project Access, he readily accepted, believing that Project Access would provide a much-needed community service.

Today, Dr. Puckett regularly donates his time and services to Project Access in two capacities. As Medical Director for Project Access, he examines referrals to be sure recommended specialty treatments match a patient's needs. As a physician, he sees patients in the cardiac clinic at Erlanger and refers patients from the clinic for

treatment and surgery. Dr. Puckett describes his work for Project Access as a two-way street: while Project Access provides much needed charity care in the community, he gets personal satisfaction from knowing he is able to contribute his medical knowledge and training to its cause.

Hospitals Get On Board

Since the very beginning, Project Access would not have been possible without the participation and cooperation of three comprehensive health care systems in Chattanooga: Erlanger Health System, Memorial Health Care System and Parkridge Health System. Today, the CEOs of these three hospitals continue to recognize the importance of Project Access in the community as well as in the health care systems they oversee.

Dr. Joseph Cofer meets with a Project Access patient.

Darrell Moore, president and CEO of Parkridge Health System, is enthusiastic about continuing to provide health care that allows people to support their families. "We and our physicians are proud to be a part of this important community health service," he says. "We have worked closely with our schedulers, our medical staff and our case managers to work with patients and connect them with resources that will be beneficial to them."

Jim Hobson, president and CEO of Memorial Health Care System believes Project Access is a vehicle through which Memorial Hospital can achieve its goal of providing a healing ministry to the community. "As a faith-based hospital, Memorial's mission is to nurture the healing ministry of the church with reverence, integrity, compassion and excellence," Hobson says. "Project Access also allows Memorial to offer testing, hospital services and specialty services such as life-saving cancer and cardiac care to those less fortunate in the community."

Jim Brexler, president and CEO of Erlanger Health System, believes Project Access fosters dynamic partnerships that bring the health care community together. "Since April 2004, our hospital systems have partnered with hundreds of local physicians to transform lives by providing quality care for those who need it most," he says. "Some wonder if our program will be needed as health care reforms go into effect over the next few years. While we hope everyone eventually has access to insurance, we believe Project Access will still be needed to insure access to care." Siskin Hospital for Physical Rehabilitation and Kindred Hospital also participate.

Physicians Get On Board

In addition to medical professionals at hospitals, retired physicians as well as physicians practicing independently throughout the area regularly donate their time to Project Access.

One of these physicians is Dr. H. Barrett Heywood, a retired orthopedic surgeon who sees patients at the Volunteers in Medicine Chattanooga (VIM) medical clinic. Every month, Dr. Heywood sees between two to ten patients who have been referred to him for orthopedic consultations through Project Access. He reviews their cases, examines x-rays and MRIs, and then refers patients back to Project Access if they require surgery. If surgery is not necessary, Dr. Heywood refers the patient to a physical therapist or a doctor for treatment.

When asked why he joined Project Access, Dr. Heywood says that he saw a service that was needed and was pleased there was an opportunity to contribute. "Dr. Heywood is just one of hundreds of doctors in our area who feel the same way about Project Access," Mrs. Bond says.

The word "partnership" is often used when local health care providers speak of Project Access. It is that partnership between hospitals and doctors that has made the initiative a success story and a lifesaving difference in the lives of thousands of uninsured Hamilton County residents. "Project Access saved me from paralysis or even death," says one Chattanooga Project Access patient. "There are no words that adequately express my gratitude for the physicians and hospitals that make it possible. Without Project Access, I don't know where I would be." 

Rebecca Rochat is a resident of Chattanooga. She attended the University of Tennessee where she earned a B.S. in child development and M.S. in textiles, merchandising and design.

THE UNIVERSITY of TENNESSEE CHATTANOOGA

At The University of Tennessee at Chattanooga, we are guided by a message that is literally chiseled into the bedrock of our campus. "We shall achieve" tells the world what to expect from our campus and our graduates. If you are interested in preparation for a career in healthcare, you can achieve your goal with a degree from UTC.

At UT Chattanooga, we achieve, and so will you.

We Shall Achieve

Project Access - Sharing the Gift of Healing in 2011

Since 2004, physicians, hospitals, health centers and other partners have donated their care and services to nearly 7,600 of our uninsured neighbors. Lives have been saved, health has been restored, and many people have been able to continue working and supporting their families because their health crisis was averted.

These wonderful partners have donated more than \$78.6 million of health care services through Project Access. The program has also directed over 7,200 individuals to other community resources.

We give thanks to these wonderful individuals and organizations who provide direct care to our patients, and to the generous individuals and companies who have helped support Project Access program operations.
